Message from the President Launch of the CIOB Bahrain Hub

On the evening of the 24th of November, the Chartered Institute of Building (CIOB) was hosted by HE the British Ambassador to Bahrain and his wife in the presence of many dignitaries including Professor Waheeb Al Khaja, Chairman of the Board of Trustees, and many colleagues and students from the University. His Excellency proudly hosted a group of influential people from the Bahrain onstruction industry as CIOB celebrated its Past, Present and Future which was part of launching the CIOB Bahrain hub. Al Hilal Enterprises sponsored the fantastic evening and dinner. The chair of the Bahrain hub, Mr Christopher Core, and members have put a lot of efforts and the presence of Matt Doran and Lauren Oldham from the CIOB office in Dubai made a big difference. Many distinguished people from the Kingdom of Bahrain and the region joined us for this event and we promoted the CIOB to the best of our abilities. I spoke about the history of the Institute and our aspirations for the future. As Past President of the CIOB and President of Applied Science University in Bahrain, I was proud to demonstrate the potentials of CIOB in Bahrain and the region and its role in education and it was so good to see some students from our University and the British University in Bahrain attending and enjoying the event. We are very eager now to see the current president of the CIOB and good friend Mr Mike Foy and the chief executive, Ms Caroline Gumble, and other CIOB officers and managers visiting us in Bahrain and the region soon.

Professor Ghassan Aouad
The President of Applied
Science University

The CIOB is the world's largest and most influential professional body for construction management and leadership with a membership of over 45,000 people from across the globe. It has a Royal Charter to promote the science and practice of building and construction for the benefit of society, and has been doing that since 1834. It accredits university degrees, educational courses and training.

The CIOB was established in London on 6 March 1834 as the Builders Society by an eminent group of 15 Master Builders. By 1867, it had become The London Master Builders Society and had 76 members. In 1884 the society was incorporated as The Institute of Builders. Following substantial development, particularly in the years following the Second World War, the Institute of Builders changed its name in 1965 to The Institute of Building and, in 1970, adopted new objectives of a broader and more professional character. That year it also registered as an educational charity.

The Institute of Building was granted a Royal Charter on 25 September 1980, thereby achieving its current name: The Chartered Institute of Building.

Some information is extracted from the CIOB web site and Wikipedia.
